
Join us as we embark on a journey to fully informed, integrated health and care. CHC 2015 provides the unique opportunity to gather with your peers across disciplines throughout the continuum of care to connect what matters across the globe.

During the event, you will hear how industry experts and your peers are driving improved financial visibility and performance across organizations, and learn about ways to manage population health and payment reform.

In addition to education, we also encourage you to enjoy time connecting with solution experts and see revenue cycle workflows in action during Solution Discovery and Gallery hours. Workflows shown will include all of Cerner’s revenue management solutions and services areas across Cerner Millennium®, Soarian, INVISION and MedSeries4.

Log into your CHC registration record and browse the CHC Build Your Agenda tool for more on each session.

Revenue Management in the Solutions Gallery

Revenue Management
Maintaining the status quo in revenue cycle management is not a viable option if your organization is aiming to remain profitable long-term. Learn how Cerner’s revenue management solutions and services can support your needs today, and how we’re innovating to meet your needs tomorrow.

Meet Arthur Davis—A Patient Financial Experience
Discover a short outpatient-to-inpatient, day-in-the-life patient financial experience where you’ll meet Arthur Davis. During this experience, you’ll follow Arthur as we highlight key areas of the workflow that support patient engagement initiatives and automation of case management functions. You’ll also see solutions that support alternative payment models like bundled payments and value-based reimbursement as well as reporting and analytics that can help you monitor the overall financial health of your organization.

Arthur’s story will run every 15 minutes during Solutions Gallery hours. Visit the information desk in the Revenue Management space on the Solutions Gallery floor to secure your spot.

Workflow areas
To learn more about the solutions you’ll see as you follow Arthur through his patient financial experience, spend some time exploring Cerner’s revenue management solutions and services including:

- Patient access
- Case management
- HIM and clinical reporting
- Enterprise document management
- Billing and contract management
- EDI services
- General financials
- Revenue management services

Solutions and services in this space will span both Millennium and Soarian platforms.

Visit the Value Stage at CHC
Speak with other Cerner associates and hear from peer organizations at the Value Stage on the Solutions Gallery floor. Here you’ll learn how some of your peers are using Cerner solutions and services to create value within their organizations.

The full schedule will be posted to the CHC event website in early September.
